Profile

Technically minded and analytical developer with a background in mechanical engineering. I am well-organised, detail-oriented, eager to learn and have extensive experience working on complex technical projects.

After completing an intensive web development bootcamp, I made the transition to a career as a developer. Since then, I have gained professional experience as a junior full-stack PHP developer while also working independently on web development projects.

I am highly motivated to learn and grow further in the field of software development. I want to contribute in a professional environment where I can learn from experienced colleagues while making use of my technical background and professional experience.

WORK EXPERIENCE

JANUARY 2026 – PRESENT

Freelance Web Developer

Vromen Web Development, Amsterdam

- Developing and maintaining websites for small businesses and clients using WordPress and Elementor
- Working on PHP/Laravel development projects for Zeno on a freelance basis

JULY 2025 – DECEMBER 2025

Junior Full-stack PHP Developer

Zeno Webdevelopment, Alkmaar

- Developing and expanding websites using PHP, Laravel, CSS, JavaScript
- Building custom functionality within existing applications
- Translating designs and client requirements into functional websites and components
- Working alongside an experienced developer and gradually taking on development tasks more independently
